Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

The claims etc. of this application describe "a lift increasing rate", "a lift decreasing rate", "a compression ratio increasing rate", "a compression ratio decreasing rate", etc., but it is not clear if these change rates are mean values or specific momentary values, the concretely changing item (unit) is not clear, and what makes it a change rate is not clear.

In Fig. 3, which shows the valve lift change and the compression ratio change as a graphic, when the valve lift change rate and the compression ratio change rate are compared, which one is faster is not clear.
